V Foods Design System Specification

Official design system and token reference for the **V Foods** campus dining platform across all four roles: **User**, **Shop Staff**, **Shop Admin**, and **Super Admin**.

1. Palette & Semantic Color Tokens

The visual foundation is anchored by a curated, accessible color palette tailored for collegiate dining environments:

Token	Hex Value	Role / Usage
`--color-royal-blue`	`#1E40AF`	Primary Brand Color (Action buttons, active tabs, links, primary highlights)
`--color-royal-blue-hover`	`#1D4ED8`	Interactive Hover State
`--color-royal-blue-subtle`	`#EFF6FF`	Tonal badge backgrounds, selected row tint
`--color-royal-blue-border`	`#BFDBFE`	Subtle primary border accents
`--color-emerald`	`#059669`	Success, Pure Veg Indicator, Order Ready, Active Status
`--color-emerald-hover`	`#047857`	Interactive Success Hover
`--color-emerald-subtle`	`#ECFDF5`	Veg dish badge background, success pill tint
`--color-emerald-border`	`#A7F3D0`	Veg indicator border
`--color-dark-slate`	`#0F172A`	Primary text, high-contrast headings, dark sidebar shell
`--color-slate-secondary`	`#1E293B`	Secondary headings, card borders, active dark icons
`--color-slate-muted`	`#475569`	Secondary body text, table column headers (WCAG AA compliant)
`--color-slate-subtle`	`#64748B`	Captions, metadata, inactive icons, timestamps
`--color-light-gray`	`#F8FAFC`	Primary background, subtle surface fills
`--color-surface`	`#FFFFFF`	Cards, sheets, dialogs, dropdown surfaces
`--color-surface-hover`	`#F1F5F9`	Hover surface for list items and table rows
`--color-border`	`#E2E8F0`	Primary divider and card border
`--color-border-subtle`	`#CBD5E1`	Input borders, table dividers
`--color-danger`	`#DC2626`	Non-veg indicator, cancelled status, destructive actions
`--color-danger-subtle`	`#FEF2F2`	Non-veg badge background, alert banner fill
`--color-warning`	`#D97706`	Pending payment, low stock alerts, preparing status
`--color-warning-subtle`	`#FFFBEB`	Warning badge background

2. Radius Scale

A single unified radius scale applied consistently across all UI elements:

Token	Value	Applied To
`--radius-sm`	`6px` (`0.375rem`)	Small badges, veg/non-veg dots, nested chips
`--radius-md`	`10px` (`0.625rem`)	Buttons, text inputs, select triggers, table filters
`--radius-lg`	`14px` (`0.875rem`)	Dish image containers, compact cards, toast containers
`--radius-xl`	`18px` (`1.125rem`)	Primary cards, modal dialogue frames, drawer cards
`--radius-full`	`9999px`	Status badges, circular icon buttons, floating cart pill

---

3. Elevation & Shadow Style

Soft, diffuse shadows that prevent harsh outlines and maintain contrast on both light gray and white surfaces:

- **Soft Shadow (`--shadow-soft`)**: `0 2px 10px -2px rgba(15, 23, 42, 0.06), 0 1px 3px -1px rgba(15, 23, 42, 0.04)` *Applied to*: Standard cards, floating navbars, dropdowns.
- **Elevated Shadow (`--shadow-elevated`)**: `0 10px 25px -4px rgba(15, 23, 42, 0.08), 0 4px 10px -2px rgba(15, 23, 42, 0.04)` *Applied to*: Active drag items, sticky headers, bottom sheets.
- **Modal Overlay Shadow (`--shadow-modal`)**: `0 20px 40px -6px rgba(15, 23, 42, 0.16)` *Applied to*: Centered dialog cards, confirmation prompts.

---

4. Spacing Scale

Based strictly on an 8-point / 4-point grid:

- `4px` (`--space-1`): Micro gaps, inline badge icons.
- `8px` (`--space-2`): Input padding, button gap, icon spacing.
- `12px` (`--space-3`): Card internal padding, list item gaps.
- `16px` (`--space-4`): Standard container padding, form field gaps.
- `20px` (`--space-5`): Modal header padding, section spacing.
- `24px` (`--space-6`): Dashboard grid gutters.
- `32px` (`--space-8`): Major layout block margins.

---

5. Typography Scale

- **Body Font**: `Plus Jakarta Sans`, system-ui, -apple-system, sans-serif
- **Heading Font**: `Outfit`, `Plus Jakarta Sans`, system-ui, sans-serif
- **Monospace Font**: `JetBrains Mono`, monospace (enforces `font-variant-numeric: tabular-nums`)

Level	Size	Weight	Line Height	Usage
Page Title	`24px` (`1.5rem`)	`800`	`1.25`	Primary screen headers (e.g. "Campus Food Courts")
Section Title	`18px` (`1.125rem`)	`700`	`1.3`	Section headings, modal titles
Card Title	`15px` (`0.9375rem`)	`700`	`1.35`	Dish name, outlet name, stat label
Body	`14px` (`0.875rem`)	`500`	`1.5`	Standard paragraph text, form descriptions
Secondary	`13px` (`0.8125rem`)	`400`	`1.45`	Dish descriptions, helper text, muted meta
Caption	`11px` (`0.6875rem`)	`600`	`1.4`	Uppercase category labels, timestamps
Price	`15px` (`0.9375rem`)	`700`	`1`	Monospace currency figures (`₹90`)
Statistic	`26px` (`1.625rem`)	`800`	`1.1`	Dashboard metrics, live order token numbers
Status	`12px` (`0.75rem`)	`600`	`1`	Order status chips, operational badges

---

6. Motion Standards

To ensure rapid, responsive interaction without disorientation:

- **Duration Window**: Strictly bounded between `150ms` and `250ms`.
- Micro-interactions (taps, chip switches, button active scale): `150ms`.
- Standard transitions (dialog open, tab cross-fade): `200ms`.
- Bottom sheet reveals: `250ms` (capped).
- **Animatable Properties**: Strictly restricted to `transform` and `opacity`. Width, height, top, left, and margin are never animated.

- **Reduced Motion**: Full compliance with `@media (prefers-reduced-motion: reduce)`. When active, animations complete instantaneously (`0.01ms`).

---

7. Component Rules

1. **Card Hierarchy (No Card-Inside-Card)**:
2. Outer layout panels use subtle surface coloring (`#F8FAFC` or `#FFFFFF`) with dividers and spacing rather than nesting bordered `.card` containers within `.card` containers.
3. **Icons**:
4. Strictly `lucide-react` .
5. Single consistent stroke width (`1.75` or `2`).
6. Absolute zero emojis across all components, toasts, empty states, and dialogs.
7. **Touch Targets**:
8. Minimum tap target of `44px x 44px` on all mobile buttons, tabs, and quantity steppers.
