- **Initial Verification Status:**
- Out of 28 audited overlay components across all 4 roles (User, Staff, Shop Admin, Super Admin), 22 were fully functional and 6 confirmed defects were documented.
- CSS styling inconsistencies identified in `saas_dashboard.css` (ghost `.saas-modal` class missing, WCAG 2.4.7 close focus ring missing, tiny 24px touch targets on mobile, lack of reduced motion queries).
- Workflow & business logic safety: Financial and Paytm calculations must remain protected.
