V Foods UI/UX Upgrade Progress Tracker

Phase 0 complete: Baseline audit recorded (Tailwind v4.3.3, React Router v7.18.4, framer-motion v13.4.4, bundle size 1,521.10 kB / 422.15 kB gzip, 1 high audit advisory on source-map-js, mapped hard-coded colors, radii, shadows, and animation code). Phase 1 complete: Foundation tools, tokens, shared components, and code splitting verified (lazy dashboard chunks for User, Staff, Admin, Super Admin). Phase 2 complete: User Dashboard enhanced with direction-aware tab transitions, item detail bottom sheet with spring physics, add-to-cart haptic feedback with animated badge bounce, Embla carousel, designed EmptyState components, and animated order tracker stepper. Phase 3 complete: Shop Staff Dashboard upgraded with gentle two-note Web Audio chime, Screen Wake Lock API service display, motion layout transitions on KDS tickets between order states, shared MenuItemFormDialog with react-hook-form and Zod validation, and instant Mark Unavailable / Mark Available toggling. Phase 4 complete: Shop Admin Dashboard transformed into a calm business tool with TanStack Table (@tanstack/react-table) across Menu, Live Orders, and Staff directory, quiet Recharts analytics in Royal Blue and Emerald palette, clear visual separation of Things to check vs Things to act on, staff member removal confirmation dialog with calm toast feedback, and shared MenuItemFormDialog. Phase 5 complete: Super Admin Dashboard upgraded as a calm control tower with TanStack React Table for master outlet registry, compact cross-outlet turnover comparison chart in Recharts, plain nested list hierarchy tree with smooth Framer Motion expand/collapse and visual connector lines (Outlet -> Shop Admin -> Shop Staff), and sanitized role filter labels. Phase 6 complete: Cross-cutting QA, bundle analysis (-0.31 kB User bundle, zero chart/table leakage), reduced motion emulation, zero emoji and zero forbidden name audits confirmed, database and payment diffs verified untouched, docs/05-tools-used.md updated, and docs/09-design-system.md created.
